

Landmark Global Alert

ITMATT/EAD Data for all postal services

Landmark services - Volumail E format, Minipak Sorted/Unsorted, Maxipak Sign, Minipak Scan, Minipak Sign & M Bags.

Dear Customer,

As you already know, starting from the 1st of January 2021 there is a change in the **global international data requirement**. This is a new requirement in the e-commerce industry and thus applied for all your shipments containing goods.

The new regulation requires you to send a set of information that contains details about your shipments, this is called **Electronic Advance Data** or **EAD**.

Mandatory information to be provided are for example:

- Number of items
- Value of items
- Currency
- Item description
- Weight
- HS Tariff code
- Origin of Goods

Providing the data in a correct format will enable a swift customs clearance in the destination country and avoid any delays and/or items being returned. If Landmark do not receive the required data, the items will not be processed and could potentially be returned.

We are ready to support you so do not hesitate to contact your Account Manager in case you have questions related to ITMATT/EAD.

With kind regards,
The Landmark Global UK Team
